DETAILED ACTION

Claim Objections

Claims 4-15 and 19-23 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1, 9, 16, and 19, the phrase "or the like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The

Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 5 recites the broad recitation binding agent, and the claim also recites latex which is the narrower statement of the range/limitation.

Claims 2-4, 6-8, 10-15, 17-18, and 20-23 are rejected as being dependent from rejected base claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 994,816 to Cahill.

Regarding Claims 1 and 16-18, Cahill teaches a method of manufacturing a plant support manufactured having an at least partially open wall, the box-shaped element (Fig. 1) being at least partially covered with a preferably substantially biodegradable covering material (Fig. 2 and page 1 line 25), the covering material being provided in such a manner that it covers the partially open wall at least partially, such that the wall

becomes soil-proof, while roots of a plant, growing in the pot during use, can grow at least partially through the covering material (page 1 line 80-84) and the wall to the outside of the plant support, characterized in that as covering material a material is manufactured from biodegradable material

Regarding Claim 2, Cahill teaches the box-shaped element is at least substantially manufactured from material having a mesh-shaped structure (Fig. 1).

Regarding Claim 3, Cahill discloses the box-shaped element is substantially manufactured from wire material (page 1 line 55).
